

UNIT 3: ANIMALS

Living things are **born, grow, reproduce and die.**

Living things have three life processes: **nutrition, interaction and reproduction.**

LIVING THINGS	NON- LIVING THINGS
 <p>The 'LIVING THINGS' column contains four illustrations: a baby sitting in a white cloth, a yellow and white striped worm, a green plant in a blue pot, and a brown bird in flight.</p>	 <p>The 'NON- LIVING THINGS' column contains three illustrations: a grey rock, a blue puddle, and a pair of scissors with red handles.</p>

We classify animals and plants into two kingdoms:

The Animal kingdom

This group includes all animals on Earth.

The Plant Kingdom.

This group includes all plants on Earth

VERTEBRATES

Vertebrates have a backbone.

Mammals, birds, reptiles, amphibians and fish are vertebrates

FISH

AMPHIBIAN

BIRD

REPTILE

MAMMAL

INVERTEBRATES

Invertebrates don't have a backbone.

Molluscs, arthropods and worms are invertebrates

MOLLUSC

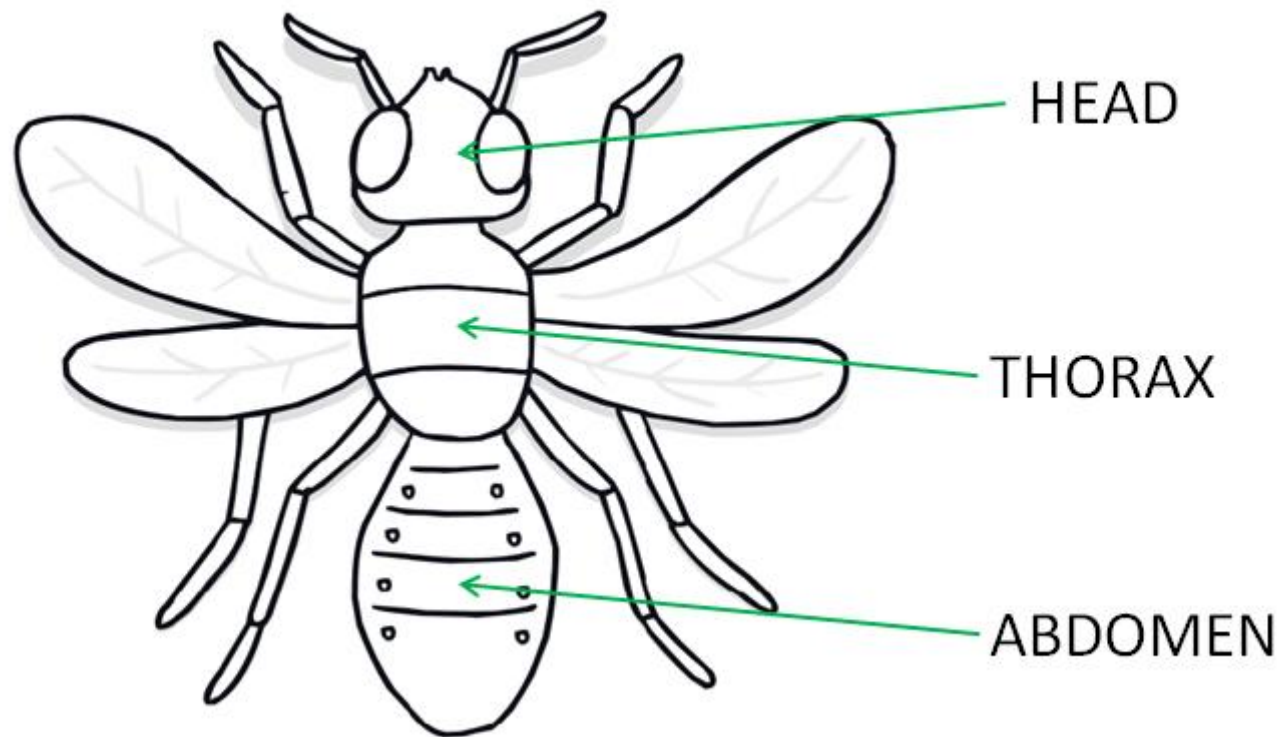

WORM

ARTHROPOD

ARTHROPODS

Arthropods have three parts.

ANIMAL NUTRITION

Herbivores eat **plants**.

Carnivores eat other **animals**

Omnivores eat **plants** and other **animals**.

HERBIVORES

CARNIVORES

OMNIVORES
